Why use Community Solar?

- Be Green
 - Partnership with the utility to generate electricity from renewables
- Save Money
 - Path to predictable energy costs
- Help environment
 - Not as dependent on traditional fuels for electricity.

How does it work?

- Solar Farm
 - Solar panels bring in the energy to convert to electricity
- Utility
 - Takes from the farm to put into their grid
- Consumers
 - Buy the electricity to use in their homes and businesses

Who is Community Solar for? Everyone!

- Renters
 - Individuals that aren't able to install solar panels
- Home Owners
 - Individuals that don't have the space or capability for solar
- Business Owners
 - Businesses that don't have the space or want the upfront costs
