

Automatic Meters for Independence

Indy Energy Forum

Sat., June 25 | 10—11:30 am

North Independence Public Library, Spring and U.S. 24 Highway

Independence is considering a major capital project to install new utility meters for IPL customers.

New IPL Deputy Director **Andrew Boatright** installed “smart” meters in Westerville, OH and will present.

Also there will be an update on the community solar project including announcements about major purchase commitments which may **double the size** of the initial solar project.

This is the seventh Indy Energy forum on electrical energy issues and the city of Independence. Learn more at www.indyenergy.org
